

Assignment 1: Risk Assessment and Mitigation Plan

1. Choose a facility (e.g., office, data center, or school) and conduct a physical security risk assessment.
2. Identify at least five potential threats or vulnerabilities.
3. Propose mitigation strategies for each identified risk.
4. Prepare a 500-word report summarizing your findings and recommendations.

Assignment 2: Designing a Physical Security System

1. Design a physical security system for a small business or organization.
2. Include the following components in your design:
 - Perimeter security measures.
 - Access control systems.
 - Surveillance systems.
 - Environmental controls.
3. Create a diagram or blueprint of your design and write a 300-word explanation of how it addresses security needs.

Assignment 3: Case Study on Physical Security Breach

1. Research a real-world case study of a physical security breach (e.g., theft, unauthorized access, or vandalism).
2. Analyze the following:
 - The cause of the breach.
 - The impact on the organization.
 - The physical security measures that were lacking or failed.
3. Prepare a 10-minute presentation summarizing your analysis and proposing improvements to prevent similar incidents.
