

### **Assignment 1: Privacy Policy Development**

1. Develop a privacy policy for a hypothetical organization.
2. Include the following components:
  - Data collection and usage practices.
  - Consent and transparency requirements.
  - Data protection measures.
3. Write a 500-word report explaining your policy.

### **Assignment 2: Ethical Dilemma Analysis**

1. Research a real-world ethical dilemma in information security (e.g., surveillance, data misuse).
2. Analyze the following:
  - The ethical principles involved.
  - The impact on stakeholders.
  - Recommended solutions or actions.
3. Prepare a 10-minute presentation summarizing your analysis.

### **Assignment 3: Intellectual Property Protection Plan**

1. Develop a plan to protect intellectual property for a hypothetical organization.
2. Include the following components:
  - Identification of key IP assets.
  - Legal protections (e.g., patents, copyrights).
  - Security measures to prevent IP theft.
3. Write a 300-word summary of your plan.
